

Integrated Risk Management Policy Statement

The Board members and staff of White Horse Contractors Ltd are committed to delivering a service of exceptional quality, whilst conducting our operations in such a way as to prevent adverse effects on the environment or injury to people. Through risk management processes, strong leadership, workforce involvement and cooperation we aim to promote a safe and healthy workplace free from accidents or incidents.

As a business we are committed to creating a positive impact on the environment through our sustainability strategy, maintaining high standards by following our quality systems to BS EN ISO 9001 and continually working towards achieving BS EN ISO 14001 and BS OHSAS 18001.

The Board have empowered senior management to ensure all of our operations and undertakings will conform, at the very least, to current legislation, approved codes of practice, recognised guidance and industry best practice. We recognise that people are our greatest asset, without whom we cannot conduct our operations; therefore we strive to encourage long service, good working conditions and a valued employee to employer relationship.

We endeavour to manage and focus upon:

- Providing excellent quality of product and service;
- Ensuring the business and its employees have competent professional advice and support by the employment of a dedicated in house Health, Safety and Environmental Manager;
- Continual systems improvement towards BS EN ISO 14001 and BS OHSAS 18001;
- Controlling hazards to people and the environment through a hierarchy of controls and robust risk management systems;
- Continual and timely supply chain competence and assessment;
- Providing for the occupational health and welfare of our staff and operatives;
- Providing, promoting and maintaining safe systems of work, designed to reduce risk to people and the environment, including the adequate provision of supervision, training, information and appropriate instruction;
- Continually work towards and sustain a target of one reportable accident per million hours worked.
- Making arrangements for all involved in White Horse Contractors projects to voice any concerns to senior management about health, safety and environmental issues, without fear of recrimination, confident in the knowledge that those concerns will be heard and acted upon.

As the Director responsible for Health and Safety, I am dedicated to ensuring we provide the excellent service and quality of product for which we are known. We are committed to ensuring that our operations are conducted in accordance with our sustainability strategy. We do this not only because it is the right thing to do, but that we also recognise the financial benefits to our continued success.

For and on behalf of The Board of Directors

Signed .

Acting Managing Director
White Horse Contractors Ltd

Date: 19th April 2011
